DR. ANNE C. STEINEMANN

Dr. Anne C. Steinemann is a Visiting Professor and Program Manager at the Scripps Institution of Oceanography, U.C. San Diego, and a Professor of Civil and Environmental Engineering and Professor of Public Affairs at the University of Washington. She received her Ph.D. in Civil and Environmental Engineering from Stanford University, where she also was a Postdoctoral Scholar. Prior to the University of Washington, she was a professor at the Georgia Institute of Technology, and had held positions as a visiting professor at Stanford University, Florida Institute of Technology, and Linköping University in Sweden.

Dr. Steinemann advises numerous governments, industries, and organizations on issues of environmental pollutants, public health, and water management, and has directed more than \$8 million in federally funded research from NSF, NOAA, USGS, NASA, EPA, and other agencies. She is currently leading the National Integrated Drought Information System activities for the State of California, as well as for the Southern California region.

Dr. Steinemann's research on hazardous chemicals in consumer products, and effects on health, has been used to change practices and policies across the country, in more than 100 public agencies, private firms, and organizations, and has formed the basis of federal and state legislation. Dr. Steinemann has also investigated more than 200 sick buildings to identify pollutant sources, reduce exposures, and improve people's health.

Dr. Steinemann received the highest teaching awards for her college and university, and the highest national honor for university teaching programs. She has published over 50 journal articles and two textbooks: Microeconomics for Public Decisions (South-Western, 2005) and Exposure Analysis (CRC Press, 2007).

Dr. Steinemann's research has received national and international media attention, spanning more than 1,000 newspapers, magazines, web publications, and radio and television stations, including the Wall Street Journal, Washington Post, National Public Radio, CBS News, ABC News, NBC News, Scientific American, USA Today, Los Angeles Times, San Jose Mercury News, Chicago Tribune, Philadelphia Inquirer, Seattle Times, San Francisco Chronicle, WebMD, Discovery Channel Magazine, Prevention Magazine, Better Homes and Gardens, Redbook, Hindustan Times, U.K. Daily Mail, and Singapore Radio.

Dr. Steinemann's international coverage reaches six continents, including the countries of Canada, Australia, Vietnam, New Zealand, Germany, Singapore, Japan, United Kingdom, India, Pakistan, China, Mexico, Guyana, Philippines, Nigeria, Slovenia, Uganda, Spain, Ghana, Italy, and Indonesia.

Total readership for magazines and newspapers alone exceeds 100 million, and she has granted more than 100 interviews with the media in the past two years.

Dr. Steinemann cares deeply about helping people. She is committed to conducting research and providing information that will improve awareness about everyday hazards, and improve public health and well-being.
