RACE DAY IS SATURDAY SEPTEMBER 8, 2018 • 10:00 AM

Bottom line: the CDC found increases in brain, liver and thyroid cancers in persons younger than 20 years of age. Read More

FEATURED STORIES

How to Protect Yourself and Your Family by Devra Davis, Ph.D.

Except in for emergencies, mobile and cordless phones should not be held next to the head. Get in the habit of using corded landlines and ethernet connected electronics whenever possible, and provide them for others to use. Instead of waiting for government action, here is what you can do right now to reduce you and your family's microwave radiation exposures and footprints.

"Bad Luck" Cannot Explain More Cancers in Young Adults and Teens

Reflecting growing scientific indications of damage from microwave-radiating cell phones, bills the Massachusetts legislature is working on could reduce the risk factor of cell phone radiation in unexplained cancers in young adults.

"Now that we know Charlotte will be one of just a dozen cities to get 5G from AT&T later this year, lightning-fast cell service likely isn't the only thing we're getting."

Dr. Devra Davis is featured in this news report on the thousands of 5G cell towers coming to Charlotte, North Carolina.

Swiss Study Shows Memory Gaps in Teens Tied to Phone Use

A recent Swiss study found that teenswho used phones regularly next to their brains had significant deficits in spatial memory--a chilling thought for any new drivers. This provides human confirmation of what has previously been found with experimental animals. Animals lose memory of where to find food after being exposed to cellphone radiation.

Petaluma California: Landmark Vote For 500-foot Setbacks on 5G Near Homes

On July 16, 2018, Petaluma City Council in California took actions regarding small cells "a.k.a. Close Proximity Microwave Radiation Antenna – Wireless Telecommunications Facilities (CPMRA-WTFs)".

5G is NG (No Good)! by Debbie Persampire

Our nation has a new and very serious issue that will compromise our precious health. It is spreading quickly and quietly because few people

are aware and no one is speaking up about it.
