Protect The Ones You Love.

Now Is The Time To Make A Difference.

I am excited to announce that Environmental Health Trust is launching a new capital campaign, "[Protect The Ones You Love.](#)" Our mission is to raise global awareness on the health risks of cell phones and wireless radiation, educate the public on reducing exposures, and promote protective policies.

Thanks to you, for a decade, our world-class scientists have carried out cutting-edge research and provided lifesaving information to protect your health and that of your family. We could not have done it without you! Now, we must expand our efforts.

Ten years ago, no one could have imagined that children would be handed radiofrequency devices as toys or that teenagers would nuzzle cell phones under their pillows at night. We equally could not have fathomed ditching our corded landlines for mobile devices, nor swapping wintertime snowball fights for virtual reality visors.

Our goal is to save lives.

Please take a moment to [visit our new campaign website](#) to see what we're developing, learn more about our upcoming efforts, and how you can help make this all happen.

DONATE

Your support will enable us to:

- Create a multimedia, multi-channel public awareness campaign on the health risks of cell phone radiation and children's unique vulnerabilities.
- Translate complex science into clear, compelling informational resources with practical solutions
- Educate medical professionals about the health effects of wireless radiation and how patients can easily reduce exposure.
- Inspire decision-makers to develop innovative science-based policy solutions and protective legislation.
- Publish cutting edge research with our world class collaborators, including modeling wireless radiation exposures from tablets and other devices to young children.

Your tax deductible end-of-year donation will directly fund our life-saving research, education, and prevention efforts. Thank you for your generosity. Together, we will continue to make a huge impact.

Wishing you and your loved ones peace, joy and good health in the coming year.

Devra Davis, PhD MPH
President, Environmental Health Trust
