Trust

Berkeley City Council: Devra Davis with Lawrence Lessig, Harvard Lawyer who defended Berkeley pro bono against the telecommunications industry.

Victory! The US Supreme Court has rejected the telecommunications attack on our Right to Know About Cell Phones.

[Help Us Win More Victories For Our Health By Donating to EHT Today](#)

Hello!

Thank you for being there for us so that we can be there for you in 2020! Your contribution allows Environmental Health Trust to start 2020 empowering and educating people around the world with our life saving work and research.

In 2019, EHT achieved major milestones in our efforts to protect you and your families. This year, we:

- **Promoted the Cell Phone Right to Know ordinance** that was affirmed as constitutional by the US Supreme Court THIS WEEK!
- **Published breakthrough 3D images** confirming children's greater vulnerability to standard emissions from exposure to virtual reality gear, tablets, and cellphones.
- **Presented data on cell phones and wireless** to city and county leaders in Boulder, Colorado and San Francisco, and to teachers' unions at the American Federation of Teachers National Conference in Washington, D.C., among others.
- **Published op-eds** on the Cell Phone Right to Know Ordinance, Cell Phones and 5G, FCC Phone Testing, 5G Technology, and Wi-Fi in schools.
- **Distributed fact sheets** on 5G, safe technology at home, family tech steps and holiday shopping, what parents need to know about Wi-Fi, and Wi-Fi exposure in schools. **[Get them here!](#)**
- **Shepherded a new pilot program** at the largest children's hospital in Cyprus to replace Wi-Fi with ethernet in pediatric intensive care and neonatal

units.

And so much more!

We could not have done it without you! No matter how small, your support makes our work possible.

And we need your support now.

DONATE TODAY

Today, we're launching our 2019 Year-End Campaign. Our goal is to save more lives in 2020 by educating parents, policymakers, politicians, and the public to the dangers of cell phone radiation and wireless. **But we need to raise \$50,000 by December 31** so that we will be able to:

- **Empower and educate** people around the world with our life saving work and research.
- Hit the ground running with our **College Education Campaign**, which supports collegiate 5G Awareness groups on campuses in the United States, Canada, and internationally.
- Complete development of our elementary middle and high school **educational curriculum** on cell phones and wireless.
- Generate **MORE credible content on the latest science and policy**. EHT translates complex science into clear informational resources so that you can share the data with your family and friends.

With an additional \$50,000 on top of that, we will be able to:

- Launch our **cutting-edge lawsuit** against the preposterous actions of the FCC on claiming that 21st-century technology can safely be evaluated with 20th-century techniques.
- **Publish research** that will inform effective public policies. Independent studies on wireless and health impacts are few and far between. Working with world experts, EHT is building a research agenda that addresses important knowledge gaps.

, we need your help to make all this happen. Would you be willing to make a special year-end donation of \$50, \$100, or whatever you can afford to help us meet our goal?

DONATE TODAY

We simply cannot do this without you. Your support will make a real, lasting impact.

Thank you for your continued friendship.

With gratitude,

Devra Davis
