

Make The Bra A NO CELL PHONE ZONE.

Dear Dolly,

The American Academy
of Pediatrics states,

**"Avoid carrying your
phone against the body
like in a pocket, sock, or
bra."**

**ENVIRONMENTAL
HEALTH TRUST**

A Shocking 5G Superbowl Ad !

During Sunday night's Super Bowl, Dolly Parton pulled a cell phone out of her bra stating that she needed "to get something off my chest." She urged people to "do it for the phones" meaning to connect to America's 5G network so that the phones can "shine their brightest."

T-Mobile has a new 5G advertising campaign where Dolly Parton calls on Miley Cyrus to "use her voice" to help the phones who are trapped in "a limited network." Miley then sings "A Song for 5G Phones" as part of the new T-Mobile Campaign "Do It For the Phones."

T-Mobile must remove this Super Bowl ad and to inform women that cell phones should stay *out of the bra*. Stay tuned for our next step.

We love Dolly Parton and Miley Cyrus. Today we urge them to join us in our call for safety. The bra should be a NO cell phone zone!

- Case Reports in Medicine published reports in 2013 documenting four young

women who developed unusual breast cancers located directly underneath the skin -where they placed their cell phones in their bra. EHT has now been contacted by over a dozen women.

- A [2020 case control study](#) published in Cancer Management and Research found cell phone use significantly increased breast cancer risk, particularly in women who used phones close to their breast.
- Research in animals and humans has accumulated indicating that cell phone radio frequency radiation is a human carcinogen ([Miller et al., 2018](#); [Carlberg and Hardell 2017](#); [Belpomme et al., 2018](#); [Portier, 2021](#)).

What can you do?

The T-Mobile ad has over 3 million views on [Instagram](#) so far. As ironic as it is, we must get the message out on social media. Please comment on this ad and spread our message of safety. Follow us on [Instagram](#), [Twitter](#), and [Facebook](#).

Love Is in the Air This Valentine's Day. Let's Leave It at That.

Protect Yourself. ♥

CELL PHONES AND BREAST CANCER

Women are developing breast cancer in the exact same place they kept cell phones in their bras, according to an increasing number of medical reports.

Cell phones emit microwave radiation linked to brain cancer and damaged DNA.

Cell phone manuals contain fine print directing users to put some distance between the phone and the body.

Learn how to reduce your exposure. Do not carry your cell phone in your bra.

DOCTORS' RECOMMENDATIONS

1. PROTECT YOUR BODY

Do not carry cell phones in your pockets or bra. No laptops or tablets on your lap.

2. PROTECT YOUR BRAIN

Prefer a corded landline phone. Hold cell phones away from the head and body by using speaker-phone.

3. PROTECT YOUR FERTILITY & YOUR PREGNANCY

No wireless devices near reproductive organs or near a pregnant woman's abdomen.

4. REDUCE WIRELESS

Turn off Wi-Fi and use cords to connect routers, phones, computers and other devices. Airplane Mode ON with Wi-Fi OFF turns off wireless.

5. DO NOT SLEEP WITH YOUR CELL PHONE

Cell phones and Wi-Fi devices are radiating even when not in use. Power off all devices at night, and keep them out of the bedroom.
