

# Environmental Health Trust Accomplishments

We are the only organization in the world that carries out critical research on cell phone radiation and other avoidable environmental health hazards, raises awareness of the public and educates policymakers promoting the development of sound public health policy.

## PROTECTING CHILDREN

It is our responsibility to enable all children to grow up in a safe and healthy environment. We educate about children's **unique vulnerability** to cell phone radiation and the impacts of electromagnetic fields (EMFs) on **pregnancy** which includes recent **research** finding increases in asthma, obesity and miscarriage.

## DEVELOPING CREDIBLE RESOURCES FOR POLICYMAKERS

EHT scientists provided expert testimony at the Congressional **hearings** on cell phone health effects EHT provides policy briefings internationally, more recently to **Massachusetts legislators**, **North Carolina Governor's office**, the **Hempfield School District** and the **Government of Mexico**. We write **letters to legislators** and provide informational resources such as for **US State bills on small cells**, **school policy on wireless**, **US protective legislation** and **EPA Reports**.

EHT has compiled **medical organization recommendations** regarding EMFs and letters from scientists about the **health risks of 5G** and about **children, RF and health**.

EHT maintains the largest database of **international local/state/federal policy** on wireless and cell phone regulations.

## PUBLISHING SCIENCE

Our scientific team and advisors **publish** research and are editors for journals—such as those just published in the highly regarded journal Environmental Research on the **heart tumors in the Ramazzini Institute Study**, on the **state of science on 5G**, the **bioeffects of millimeter waves** and **radio frequency radiation-related cancer in the military setting**.

## RAISING SOLUTIONS-ORIENTED AWARENESS

Dr. Davis publishes articles in **The Hill**, **Baltimore Sun**, **Huffington Post** and **Oxford Press**. EHT provides background information for major news **reporters** and EHT scientists are featured in the **Wall Street Journal**, **CNN**, **NPR**, **CBC**, **Fox 5**, **San Francisco Chronicle**, the **Today Show** and **more**.

Resource pages about EMFs for **pediatricians**, **parents**, and **young adults**.

We have created **Safe Tech Do's and Don'ts**, **factsheets on 5G**, **cell phone radiation**, **wireless** and **"What Parents Need to Know About Safe Technology"**.

EHT has developed colorful **postcards** for parents about the **American Academy of Pediatrics recommendations**, for young adults who **sleep with their phones**, for men regarding **phones in pockets** and for women to make the bra a **no-phone zone**.

Our YouTube **playlists** feature **30-second Public Service Announcements** and a **music video about cell phone radiation**—all resources sponsored by EHT. We also will translate PSAs from other countries that are implementing awareness campaigns (such as **Cyprus** and **French Polynesia** have).

EHT has created colorful **graphics** that raise awareness about cell phone radiation to share on social media, a cell phone **infographic**, and a **Social Media Toolkit** to help spread the word. We publish monthly **newsletters** with the latest news and science.

## ADVANCING SCIENCE

Our Expert Medical and Technical Conferences and Proceedings include:

- **2017 Israel Institute for Advanced Study, Hebrew University**
- **2017 International Doctors Symposium**
- **2016 Pediatric Academic Societies**
- Invited Scientific Lectures at the **American Academy of Pediatrics**, **National Institutes of Environmental Health Sciences**, **George Washington University** and **Melbourne University**

EHT submitted extensive scientific **comments** on the US National Toxicology Program study on cell phone radiation, presented oral **comments** in person and issued a **newsletter**.

EHT topics cover the research on **health effects**, **headaches**, **brain development**, **cell towers**, **Electromagnetic Sensitivity**, the impacts of EMFs on **Wildlife**, **Trees**, **Plants** and **Bees** and the **synergistic effects of EMFs and other exposures**.

## IMPACTING POLICY

EHT has worked toward long lasting meaningful policy changes for a decade. We provided critical expertise that supported the **Berkeley Cell Phone Ordinance**, the **Maryland State Advice**, the **San Francisco Recommendations**, the **Massachusetts EMF Legislation** and the **California Department of Health Cell Phone Recommendations**.

We compile playlists on **5G**, **children**, **documentaries**, **international policy**, **pregnancy** and the **latest research** and **exposure modeling** on cell phones.
