

There's so much significant news to share with you this month!  
Watch for one more EHT newsletter this week — they'll be different videos, different articles and more.

## Yellowstone Park To Be Flooded with Wi-Fi 100 Trees Already Cut Down

A company called AccessParks wants to install 484 wireless antennas within and atop historic lodges (including the iconic Old Faithful Inn), visitor centers, and other buildings to bring broadband throughout most of the park's developed areas. 100 trees, in a stand approximately 30 years old, have already been removed to increase reception for a facility.

Dear Friends,

This newsletter covers a large amount of the latest breaking news in 5G and wireless. Resolutions to halt 5G are being passed and the conflicts of interest are being revealed. We felt it was critical for you to have *all this information*.

This month EHT testified to the Washington DC National Capital Planning Commission on 5G, presented to Ohio on 5G and is finalizing yet another publication.

We could not do this without your support. We need to raise 50,000 immediately for our legal action against the FCC.

Please [DONATE to EHT today](#) so we can continue our work pushing for government accountability, raising awareness and promoting sound protective policy.

Theodora Scarato,  
Executive Director, Environmental Health Trust

### **Long-Term Exposures to EMF are Not Addressed in the Current Guidelines**

A new article by Frank Barnes and Ben Greenebaum published April 2020 "Setting Guidelines for Electromagnetic Exposures and Research Needs" based on the urgent need for adequate safety limits.
