FCC Compliance Statement:

This device complies with Part 15 of the FCC Rules. Operation is subjected to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in residential installations. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television equipment reception, which can be determined by turning the equipment on and off, the user is encouraged to try to correct the interference by one or more of the following instructions:

- Reorient or relocate the receiving antenna.
- Move the equipment away from the receiver.
- Plug the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for additional suggestions.

Use ▲▼ ◀▶ keys to select a language in the language Menu.

5. System

Reset Settings
Software Update (USB)
SW Information

Use ◀▶ and OK button to achieve the desired settings.

If projecting over long periods of time

The built-in battery supports about **1.5hrs** of projection time. If you will be projecting over a long period of time, we recommend that you use the supplied AC adapter.

When the battery gets low, the low battery capacity icon  will flash. When you see this you need to plug your projector into the AC adapter and the AC adapter into a wall outlet.

If your battery gets low and you do plug it into a AC adapter, the projector will enter standby mode automatically, Plug it in and press any button to exit standby mode.

In standby mode, the LED Indicator will light up on the top panel.

Due to its high performance engine its normal for the projector to get warm with continuous work.

If the projector runs for a long time and becomes over-heated, the High-Temperature icon  will appear on the screen. The system will automatically enter the standby mode, Let cool and press any button to exit standby mode.
