DATE: May 16, 2019
TO: Governor Newsom
FROM: Devra Davis | Environmental Health Trust
SUBJECT: 5G

Dear Governor Newsom,

I am writing to ask you to insist that information be generated on the Environmental and Public Health impacts of 5G technology prior to its widespread introduction. You may recall that we discussed the issue of wireless radiation safety when we were both appointed global environmental gurus for Newsweek Magazine, you were expecting the birth of the child, And I worked with the city as an expert adviser.

The grounds for my request at this time can be found in a series of documents that are noted below. In my book Disconnect published in 2010, I applauded your courageous statement to the telecom industry that the city of San Francisco was not for sale. Your leadership in having the city pass unanimously a right to know Bill has inspired many others around the world as is indicated on our website. The dénouement sadly did not result in the widespread public educational effort we had anticipated

Today the world looks quite different. The advice of the American Academy of Pediatrics to limit exposures of young children to on phone radiation is not widely appreciated. Nor is the extensive scientific literature showing damaging effects of wireless radiation More broadly known.

Finally releasing guidance some nine years after it began the effort. I also want to request that you have the state health department review and can evaluate including cell phone and other wireless radiation under proposition 65 as a possible carcinogen known to the state of California The state health departments worked on this issue for a number of years, Finally releasing guidance some nine years after it began the effort. I have no doubt that they would be able to make it with judgment on this issue at this time because science has become so much more developed as you will see below

Of course, I would be delighted to meet with you and your staff at anytime to discuss this further as I now have two wonderful granddaughters living in your great state

Please share with your staff the following information and science.

EHT Letters Summarizing the Science

- February 15, 2019 - [Letter to Jackson Wyoming Town Council](#)
- March 28, 2019 - [Letter to Baltimore Planning Commission regarding Proposed Legislation on Small Cells](#)

- April 10, 2019 - [Letter to the National Park Service](#) documenting impacts to the environment.

Research Studies
