DATE: May 31, 2019 -
TO: Teton County Wyoming
FROM: Devra Davis | Environmental Health Trust
SUBJECT: Comment on County Regs Re: "5G densification"

Dear Teton County Council Members:

We are writing to inform you of the scientific grounds that are the basis for hundreds of scientists calling for a moratorium on 5G and the rollout of 4G "small cells".

FCC limits for Wireless radiation are over twenty years old. The EPA was defunded from developing proper safety standards. Instead, the FCC adopted industry-friendly guidelines from industry filled and industry loyal groups. Today the world looks quite different and the way we use cell phones and wireless devices has drastically changed.

There is extensive scientific literature showing damaging effects of wireless radiation on the environment and human health- especially for children.

The [American Academy of Pediatrics](#) recommends limiting young children's cell phone radiation exposures.

Similar to cell phones and other wireless devices, these 5G "small cells" will emit microwave radiation. This radiation is associated with a wide array of adverse [health](#) and [environmental](#) effects, including but not limited to: disrupted [migration](#) and [orientation](#) of animals like birds and insects, [cancer](#), [reproductive harm](#), [DNA damage](#), [immune dysfunction](#), [damage to the blood brain barrier](#), [altered brain development](#), [disruptions to heart functioning](#), [mental health effects](#), [memory impairment](#), [sleep disturbances](#), and [tree/plant/crop](#) damage. Multiple reviews worldwide have [documented damage](#) to the male reproductive organs.

5G and 4G densification is a serious concern for [wildlife](#). As the [U.S. Department of Interior](#) has noted, radiation studies at cellular communication towers have documented "nest and site abandonment, plumage deterioration, locomotion problems, reduced survivorship, and death" among birds. Experts warn that [amphibians and insects](#) are at particular risk from 5G. Indeed, the technology may even be able to "[punch irreparable holes in the food web](#)."

EHT Letters Summarizing the Science on 5G, and 4G cell towers and Wireless

- February 15, 2019 - [Letter to Jackson Wyoming Town Council](#) - Letter to Jackson Town Council on the current scientific risks of 5G and proposed policy options.
- March 28, 2019 - [Letter to Baltimore Planning Commission regarding Proposed Legislation on Small Cells](#) - This letter summarizes the research and science on wireless facilities.

- April 10, 2019 - [Letter to the National Park Service](#) - Documenting impacts on the environment and wildlife from cell towers and wireless facilities.
