U.S. Department of Interior Says Wildlife is Not Protected by Current FCC Standards

U.S. Department of Interior Tackles FCC on Negative Impacts of Cell Towers on Wildlife

"The electromagnetic radiation standards used by the Federal Communications Commission (FCC) continue to be based on thermal heating, a criterion now nearly 30 years out of date and inapplicable today." The Department of Interior charged that the FCC standards for cell phone radiation are outmoded as they do not adequately protect

wildlife. Read the Department's letter [here](#). [Learn More](#)

Scientists Speak Out

The RSC's conflicted review of Safety Code 6 is now released to the public. On April 1st, 2014, the Royal Society of Canada submitted its Review of Safety Code 6: Health Canada's Safety Limits for Exposure to Radiofrequency Fields. Despite selecting highly conflicted academics to its review panel, and having to replace three of them after a conflict of interest was exposed in the Canadian Medical Association Journal, the panel went ahead with its report. [Learn more](#)

Electromagnetic Radiation Disorients Migratory Birds

Nature reports that interference from electronics and AM radio signals can disrupt the internal magnetic compasses of migratory birds. Researchers conducted studies, finding that electromagnetic radiation created by humans disorient birds and they cannot find their way, threatening their capacity for survival. [Learn more](#)

Wise Presents: Over-Powered (May 29th)

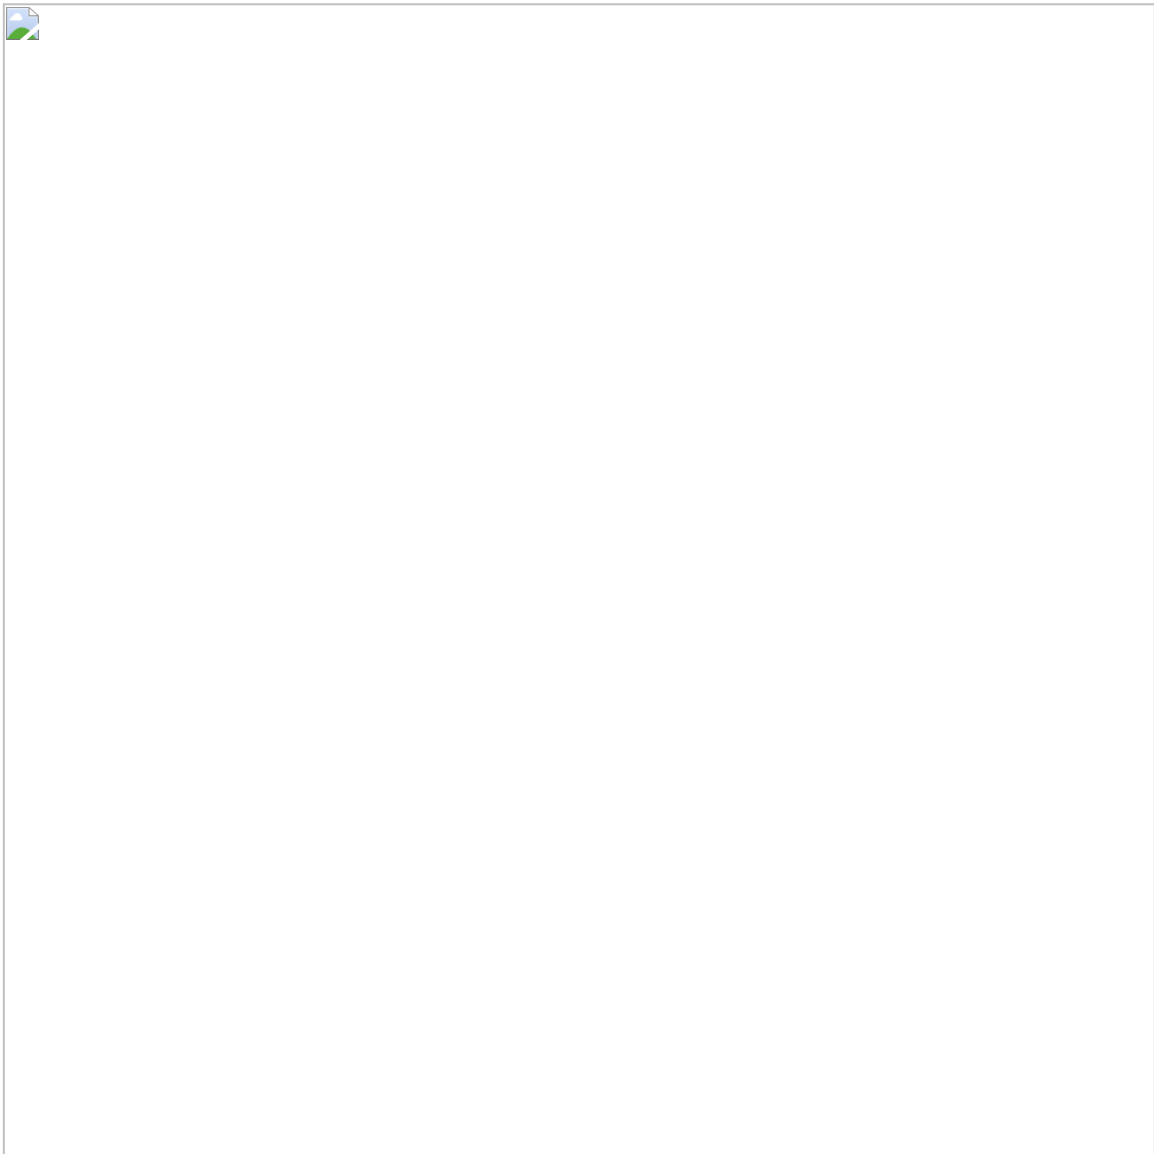

Grassroots group W.I.S.E (Wireless Education and Safety Education) is concerned about cell and wireless emissions, and will host an educational session on the topic at Lafayette Library. Come hear the scientific presentation on the health effects of cell phones, cell towers, smart meters, and other

devices. Featuring Dr. Martin Blank, who will discuss the biological effects of EMF. [Learn more](#)

Look Up:

Click to watch the viral video showing how digital devices are disconnecting us.

EHT needs your help to complete our infant and toddler brain modeling study to

learn the true levels of radiation that young children absorb from wireless devices. Although millions of young children are using devices today, nobody can tell us what this may mean for their health. [Learn More](#) about what it means to be a volunteer.
