Myth Versus Fact on 5G

Scientists often speaking outside their professional field routinely misunderstand and confuse the physics with the biological impacts of wireless radiation exposure. What they say about the safety of wireless radiation is wrong. And we have the science to prove it.

Join us on Tuesday, Jan. 25, 2022, at 11:30 a.m. ET, 8:30 a.m. PT, as EHT founder Dr. Devra Davis and Physics Professor Paul Ben Ishai of Ariel University hold a live event to discuss the myths vs. facts on the science of wireless radiation.

You can join by Zoom or watch Live on Facebook.

REGISTER

MYTH: The FDA has reviewed **the totality of the science** to ensure cell phones, cell towers and 5G are safe.

FACT: The FDA has **never released an evaluation** of the health risks of wireless based on a review of **the full body of science**.

FACT: No U.S. health and safety agency has ever systematically reviewed how **5G deployment** will **impact humans or wildlife**.

PATREON

Support EHT and Get First Access to the Science and Policy Issues We're Pursuing

Environmental Health Trust provides the educational resources, research studies, and facts on the biological and environmental impacts from electromagnetic and radiofrequency radiation. We expose the TRUTH about the science and policy of wireless.

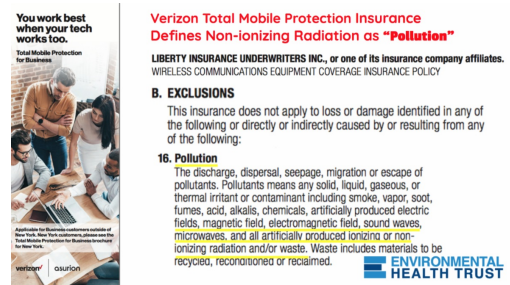

And we need your help. Your Patreon subscription allows EHT to make sure that the science reaches the public and policymakers. Join at a monthly contribution level that works for you and we will make sure you're on the cutting edge of the science and at the forefront of the conversation.

IN CASE YOU MISSED IT

Health Effects of Cellphone & Cell Tower Radiation by Dr. Moskowitz

In this must-watch webinar hosted by the University of California at Berkeley's Center for Occupational and Environmental Health, Dr. Joel Moskowitz summarizes the science and implications for 5G.

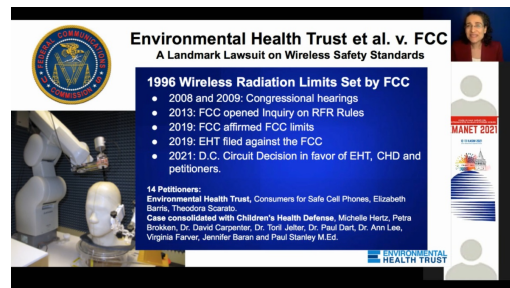

If 5G is So Safe Then Why Do Wireless Companies Warn Their Shareholders but Not Consumers?

Yes, wireless radiation is defined **as a pollutant**. Read the article in Medium by EHT's Theodora Scarato for links and more.

Why Big Telecom Ignores the Science on 5G

Another must-watch webinar with Commissioner Kent Chamberlin, of the State of New Hampshire Commission to Study the Environmental and Health Effects of Evolving 5G Technology. In our recent Patreon event, he states, "From what I've seen, news outlets are very unwilling to bite the hand that feeds them."

International Policy on 5G, Cell Phones, and Wireless Radiation

EHT Executive Director Theodora Scarato presents on the FCC lawsuit and international policy to the Conference on Electromagnetic Fields organized by the Istanbul branch of the Chamber of Electrical Engineers, the Istanbul Medical Chamber, and the Istanbul Bar Association.

5 Ways Your Phone Increases Radiation

ON YOUR BODY

The closer the phone is, the more radiation your body and brain absorbs.

STREAMING

Videos, facetimeing and pics create more radiation than just a text.

LOW SIGNAL

Phones work harder and pump out more radiation.

TOO MANY APPS

Apps are always updating.

More apps = More radiation.
Downloading large files also = more radiation

IN THE CAR

Radiation can intensify inside metal. Plus your phone greets each new cell tower with a hit of radiation.
