October 2017

 Three overlapping social media graphics. The leftmost graphic shows two children in medieval costumes with the text: "THE AMERICAN ACADEMY OF PEDIATRICS RECOMMENDS ... 'Avoid carrying your phone against the body like in a pocket, sock, or bra. Cell phone manufacturers can't guarantee that the amount of radiation you're absorbing will be at a safe level.' - AAP. The AAP recommends families reduce exposure to microwave radiation emitted by cell phones and wireless devices. EHTrust.org". The middle graphic shows a child looking through binoculars with the text: "AMERICAN ACADEMY OF PEDIATRICS RECOMMENDS ... 'Keep an eye on your signal strength (i.e. how many bars you have). The weaker your cell signal, the harder your phone has to work and the more radiation it gives off. Better to wait until you have a stronger signal before using your device.' The AAP recommends families reduce exposure to microwave radiation emitted by cell phones and wireless devices. EHTrust.org". The rightmost graphic shows a woman looking shocked at a tablet with the text: "DID YOU KNOW... WIRELESS DEVICES EMIT RADIATION 24/7. Corded connections do not emit radiation. Disable all wireless transmitters when not in use, particularly when handing a device to a child. Set Airplane Mode ON with Wi-Fi OFF & Bluetooth OFF. EHTrust.org #PracticeSafeTech".
