*Education, Research and Policy to Reduce Environmental Risks*

## Tablets Could be Harming Kids' Health, Study Says

They are being embraced by educators as important learning tools, but some health experts are warning that tablets and smartphones can have harmful health effects, especially on young, developing children. Dr. Devra Davis says microwave radiation from the devices poses significant risks to children. [Learn more](#)

## Schools and Safe Technology

Parents and policymakers need information to support safe technology in schools. Visit EHT's new webpage on Schools and Safe Technology to download our Briefing Book for Schools, a parent factsheet, and Ten Tips for Safer Tech, offering solutions to reduce children's exposure to electromagnetic radiation. [Learn more](#)

## Legal But Lethal: Cell Phone Radiation

Read Dr. Davis's report in *San Francisco Medicine*, the Journal of the San Francisco Medical Society, about the public health impacts of cell phone radiation. [Learn more](#)

## #PracticeSafeTech

Ongoing research shows that magnetic radiation emitted by cell phones can harm both [men](#) and [women](#). Take some time away from your devices today.

[Learn more](#) about what it means to be a volunteer.

EHT needs your help to complete our infant and toddler brain modeling study to learn the true levels of radiation that young children absorb from wireless devices. Although millions of young children are using devices today, nobody can tell us what this may mean for their health.
